Prorated Replacement

To determine the replacement price, the appropriate pro rata percentage from the customer participation chart is multiplied by the current list price.
The appropriate pro rata percentage is determined using the months of service and the useable tread wear, where:

$$\text{Actual Useable Tread Wear \%} = \frac{\text{New Height - Average Height}}{\text{New Height - Wearout Height}} \times 100$$

Track still in use past the warranty period, or worn to less than wearout height (13mm or 1/2 in), are not eligible for warranty coverage.
