RUBBER TRACK SYSTEM FOR COMBINE HARVESTERS

ST-1000

SUPERIOR TRACTION AND FLOTATION

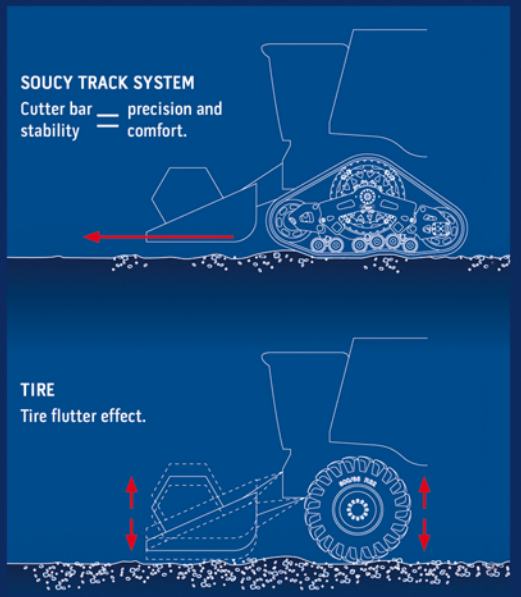

Advanced flotation properties of Soucy Track system enable movement without risk of damage even in places where rubber-tire vehicles get bogged down. Designed to cope with the toughest conditions and terrain, our rubber track systems are manufactured according to stringent standards.

The traction profiles of Soucy Track products offer excellent grip and outstanding traction.

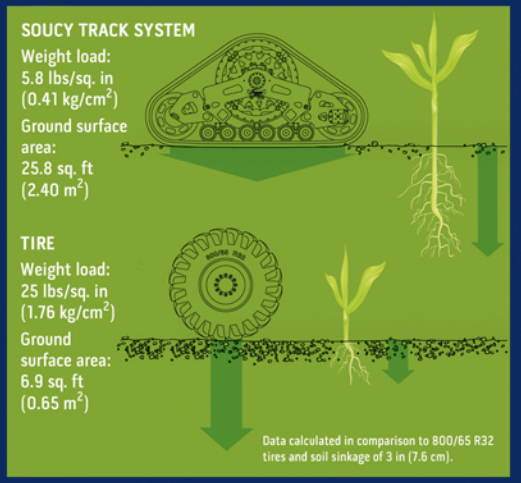

It also means reduced fieldwork in terms of correcting surfaces damaged by wheel slippage, thereby minimizing any chiselling costs.

Soucy TRACK

UNEQUALLED ROLLING COMFORT

SIGNIFICANTLY REDUCED COMPACTION
